

Set My People Free Intervention Tuesday 29 Session 13

Compacting Hate Crimes and ensuring protection against discrimination

Hate Crimes

I will like to introduce to you a number Hate Crimes committed which were not mentioned today in the Sessions

1) **The Charlie Hebdo** 7 of January shooting motivated by blasphemy law in Islam which led to death of 11 journalist. The death penalty for Blasphemy in Islam is practiced in more than 10 countries world wide. It was a Hate Crime which led to death. Not to forget the Kosher supermarket attack.

2) **Copenhagen freedom of speech meeting shooting on the 4 of Feb.** in a cafe and the synagogue. The Shooting in Copenhagen free was the second Hate Crime and was also attack on freedom of speech

3) 23 August

Train attack on innocent passengers of a train in France. 3rd series attack of hate crime fortunately the marines stopped it.

All this attacks of hate crimes were committed by immigrants in the EU with EU citizenship who had some affiliation with mosques and who claim they are muslims. One only was and immigrant worker.

5) Honour killing it the way sharia law is applied in EU

Mostly effect women for having a relationship with non muslim or for leaving Islam or islamic law. Honour killing strip women from freedom as they fear execution for disobedience. The community does not need to kill many one is enough to scare the others. We need to protect women from that.

This is an example 28 September 2015 Mail on line

Muslim father strangled daughter, 19, to death in 'honour killing' after she was caught stealing condoms for sex with her forbidden boyfriend in Germany

Asadullah Khan, 51, said he killed his daughter Lareeb for bringing 'dishonour' on the family with her love for a boy he didn't approve of home city of Darmstadt in Germany, and tipped the corpse down it.

6) x-muslim face death threats in the OSCE region and in danger to be killed. Mona Walter, Ayan Hersi,

Wafa Sultan Living under protection nearly 24 hours. This threat to x-muslims should not be tolerated.

7) Conclusion and recommendations

As one of the Introducers said; This does not come from vacuum.

We have to Relies the problem and acknowledge that terrorism is hate crime

Hate Crime is the Product of their society or community which is not tolerance.

We need to recognise that terrorist attacks is hate crime against European values

First step the community of the terrorist should not be enclosed to it self, but open to others and tolerant.

The community of the terrorist attack should be tough tolerance and freedom of thought conscience and belief.

Abolish the teaching of Apostasy blasphemy laws in Islam There is no freedom of belief without freedom to change religion there is no religious freedom and with Blasphemy law there is no freedom of speech.

Women and x-muslims should be protected.

Condemn terrorism *There is no justification for killing innocent for Unemployment, discontent, marginalization or poverty does not justify terrorism and murder of innocent.*
