In Donetsk region, the SMM recorded 175 ceasefire violations, including 96 explosions (five impacts of tank fire rounds and 91 undetermined). The majority of ceasefire violations occurred in areas north of the disengagement area near Petrivske (non-government-controlled, 41km south of Donetsk) (see below) and in areas south of Svitlodarsk (government-controlled, 57km north-east of Donetsk). The Mission assessed ten ceasefire violations, including five explosions (impacts of tank fire rounds), in an area west of Sofiivka (formerly Karlo-Marksove, non-government-controlled, 40km north-east of Donetsk) and five undetermined explosions in an area west of Yenakiieve (non-government-controlled, 41km north-east of Donetsk) as live-fire exercises inside the security zone, in violation of the decision of the Trilateral Contact Group (TCG) of 3 March 2016 that prohibits the conduct of live-fire training in the security zone. In the [previous reporting period](#), the Mission recorded 187 ceasefire violations in the region, some of which also occurred near Svitlodarsk.

In Luhansk region, the SMM recorded 151 ceasefire violations, including 131 undetermined explosions. The majority of ceasefire violations occurred in areas west-south-west of the disengagement area near Stanytsia Luhanska (government-controlled, 16km north-east of Luhansk) (see below) and in an area south-west of Vesela Hora (non-government-controlled, 16km north of Luhansk). In the [previous reporting period](#), the Mission recorded 148 ceasefire violations in the region.

Following agreement reached at the meeting of the TCG on 22 July 2020 regarding Measures to strengthen the ceasefire, from 00:01 on 27 July 2020 until the end of the reporting period, the SMM has recorded at least 101,102 ceasefire violations in both Donetsk and Luhansk regions (including 27,732 explosions, 24,313 projectiles in flight, 440 muzzle flashes, 455 illumination flares and at least 48,162 bursts and shots).

### **Civilian casualty corroborated in non-government-controlled Rovenky, Luhansk region**

The SMM followed-up on reports of an 18-year-old man injured in Rovenky (non-government-controlled, 54km south of Luhansk) on 13 December 2021.

On 10 January, a woman (age unknown), who introduced herself as the mother of the injured man, told the SMM over the phone that her son had been walking his dog near their house in Rovenky on 13 December, when she heard an explosion and then saw that her son's hands were injured. She added that she then called an ambulance which took her son to a hospital in Rovenky.

On 31 December, medical staff at a hospital in Rovenky told the Mission, that on 13 December an 18-year-old man had been admitted with wounds to his hands, consistent with those caused by the detonation of an explosive device.

### **Disengagement areas near Stanytsia Luhanska, Zolote and Petrivske<sup>5</sup>**

While positioned inside the **disengagement area near Stanytsia Luhanska**, the Mission heard 44 undetermined explosions and 15 bursts of heavy-machine-gun fire, all assessed as outside the disengagement area but within 5km of its periphery.

---

<sup>5</sup> Disengagement is foreseen in the Framework Decision of the Trilateral Contact Group relating to disengagement of forces and hardware of 21 September 2016.

During the day on 12 January, inside the **disengagement area near Zolote** (government-controlled, 60km west of Luhansk), an SMM long-range unmanned aerial vehicle (UAV) spotted a person in a former position of the Ukrainian Armed Forces close to road T-1316, about 250m south of the area's northern and about 1.7km east of its western edge.

On the evening and night of 12-13 January, the SMM cameras in Zolote and Popasna (government-controlled, 69km west of Luhansk) recorded four undetermined explosions and two projectiles in flight. All these ceasefire violations were assessed as outside the disengagement area near Zolote but within 5km of its periphery.

During the day on 13 January, near the checkpoint of the armed formations south of the disengagement area, the Mission saw three members of the armed formations (wearing armbands with "JCCC" written on them). The SMM again saw the seven previously observed containers located south of the area's southern edge and inside the disengagement area. It also observed that the previously reported road barriers across road T-1316, on the area's southern edge, continued to be closed.

During the day on 12 January, inside the **disengagement area near Petrivske**, an SMM long-range UAV spotted a person in a former position of the Ukrainian Armed Forces about 1.5km north-east of the area's south-western corner. Also inside the area, about 200m west-north-west of the area's south-eastern corner, the same UAV spotted a person in a former position of the armed formations.

On the evening of 12 January, the SMM camera in Petrivske recorded three projectiles in flight. During the day on 13 January, the Mission heard 64 bursts of heavy-machine-gun fire. All these ceasefire violations were assessed as outside the disengagement area but within 5km of its periphery.

### **Weapons that the SMM could not verify as withdrawn<sup>6</sup>**

*At two heavy weapons holding areas in government-controlled areas of Donetsk region*  
13 January

The SMM noted that all weapons observed at these sites were present, compared with the previous visits on 7 December 2021.

### **Withdrawal of weapons**

The Mission continued to monitor the withdrawal of weapons in implementation of the Memorandum and the Package of Measures and its Addendum.

In violation of withdrawal lines, the SMM spotted one surface-to-air missile system and one self-propelled howitzer in government-controlled areas of Donetsk region and 35 multiple launch rocket systems, seven tanks and four self-propelled howitzers in non-government-controlled areas of Donetsk and Luhansk regions, including in four training areas and at a compound.

---

<sup>6</sup> The SMM observed weapons that could not be verified as withdrawn, as their storage did not comply with the criteria set out in the 16 October 2015 notification from the SMM to the signatories of the Package of Measures on effective monitoring and verification of the withdrawal of heavy weapons.

Beyond withdrawal lines but outside designated storage sites, in non-government-controlled areas of Luhansk region, the Mission spotted 30 tanks, 11 howitzers, six surface-to-air-missile systems and three anti-tank guns, located in three training areas. (For further information, see the tables below.)

### **Indications of military and military-type presence in the security zone**

The Mission spotted an anti-aircraft gun in a government-controlled area of Donetsk region and a probable infantry fighting vehicle in a residential area of a non-government-controlled area of Donetsk region. (For further information, see the table below.)

### **SMM facilitation of the operation and repair of critical civilian infrastructure**

The Mission continued to facilitate the operation of the Donetsk Filtration Station (15km north of Donetsk).

The SMM also monitored repairs to a phenol sludge reservoir near Nelipivka (government-controlled, 40km north of Donetsk).

### **Situation at entry-exit checkpoints and corresponding checkpoints**

In Luhansk region, the Mission observed that the entry-exit checkpoint (EECP) near Stanytsia Luhanska was open, with people queueing to travel to government-controlled areas.

The SMM noted that the EECPs near Zolote and Shchastia (government-controlled, 20km north of Luhansk) were open, but that the corresponding checkpoints of the armed formations south of the disengagement area near Zolote and 3km south-east of the bridge in Shchastia were closed. Near the EECP near Zolote, the Mission observed three new containers (for previous observations in the area, see [SMM Daily Report 29 December 2021](#)).

The Mission continued monitoring in Kherson, Odessa, Lviv, Ivano-Frankivsk, Kharkiv, Dnipro, Chernivtsi and Kyiv.

### **\*Restrictions of the SMM's freedom of movement or other impediments to fulfilment of its mandate**

*The SMM's monitoring and freedom of movement are restricted by security hazards and threats, including risks posed by mines, unexploded ordnance (UXO) and other impediments – which vary from day to day. The SMM's mandate provides for safe and secure access throughout Ukraine. All signatories of the Minsk agreements have agreed on the need for this safe and secure access, that restriction of the SMM's freedom of movement constitutes a violation, and on the need for rapid response to these violations. They have also agreed that the Joint Centre for Control and Co-ordination (JCCC) should contribute to such response and co-ordinate mine clearance. Nonetheless, the armed formations in parts of Donetsk and Luhansk regions frequently deny the SMM access to areas adjacent to Ukraine's border outside control of the government (for example, see [SMM Daily Report of 4 January 2022](#)). The SMM's operations in Donetsk and Luhansk regions remain restricted following [the fatal incident of 23 April 2017 near Pryshyb](#); these restrictions continued to limit the Mission's observations.*

Denial:

- On the south-western edge of Novoselivka (non-government-controlled, 37km north-east of Donetsk), a visibly armed member of the armed formations denied the SMM passage east towards a training area, citing “ongoing live-fire exercises”.

*Regular restrictions related to disengagement areas and mines/UXO:*

- The sides continued to deny the SMM full access, as well as the ability to travel certain roads previously identified as important for effective monitoring by the Mission and for civilians’ movement, through failure to conduct comprehensive clearance of mines, UXO and other obstacles.

Delay:

- At a checkpoint in Staromykhailivka (non-government-controlled, 15km west of Donetsk), three armed members of the armed formations allowed the Mission passage further west into the settlement only after about 35 minutes, referring to the SMM’s safety. While at the checkpoint, the SMM observed civilian traffic passing through.

<sup>9</sup> The table only includes ceasefire violations directly observed by SMM patrols or recorded by the SMM cameras, and it may include those also assessed to be live-fire exercises, controlled detonations, etc. Details provided – in terms of distance, direction, weapons-type, etc. – are based on assessments provided by monitors on the ground and technical monitoring officers, and are not always necessarily precise. When information is not known (indicated with an “N/K”), the SMM was unable to ascertain such information due to distance, weather conditions technical limitations and/or other considerations. Ceasefire violations recorded by more than one patrol/camera and assessed to be the same are entered only once.

### Map of Donetsk and Luhansk regions<sup>10</sup>

<sup>10</sup> The SMM is deployed to ten locations throughout Ukraine – Kherson, Odessa, Lviv, Ivano-Frankivsk, Kharkiv, Donetsk, Dnipro, Chernivtsi, Luhansk and Kyiv – as per Permanent Council Decision 1117 of 21 March 2014. This map of eastern Ukraine is meant for illustrative purposes and indicates locations mentioned in the report, as well as those where the SMM has offices (monitoring teams, patrol hubs and forward patrol bases) in Donetsk and Luhansk regions. (In red: a forward patrol base from which SMM staff have temporarily relocated based on recommendations of security experts from participating States, as well as SMM security considerations. The SMM uses the premises during daylight hours and also patrols in this settlement during daylight hours).
