MEANS AND TECHNOLOGIES OF MINE CLEARANCE:

The engineer units of the Armed Forces of the Czech Republic are equipped with the Midi-flail mine clearance system BOZENA 5 (hereinafter referred as BOZENA).

BOZENA is a tracked mechanical mine clearing machine remotely controlled by a transmitter with a range of 2,000 m, meant for clearing anti-personnel mines both pressure and tripwire fused and for anti-tank mines up to 9 kg of TNT charged. The system is suitable for clearing large mine affected areas. It can be road transported on trailer between working areas.

BOZENA is protected from detonations by an armoured shield situated at the front of the vehicle, directly behind the flail. In addition, the whole machine is protected with an armoured metal covering, giving protection against damage from detonations.

Matters pertaining to compliance and implementation not covered by the formal reporting requirements contained in Article 7

The Czech Authorities conducted an investigation concerning the importation and storage of mines at the private company. In this matter, the court issued a final judgment that no crime had been committed.

On January 1, 2016, the Military Training Area Brdy was abolished by Act No. 15/2015 of the Collection of Laws, on the border military districts. The process of search, detection and destruction of UXO in this area was completed.

Soldiers from the pyrotechnic cleansing detachment of the 15th Engineer Regiment have completed the pyrotechnic sanitation (the recovery and final disposal of unexploded ordnance or munitions) of the Brdy Protected Landscape Area which they had been working on since 2012.

In total, the disposal squad discovered and neutralised 9,848 pieces of artillery shells, rockets and tank ammunition which was on or beneath the ground surface, and originated primarily from former Warsaw Pact troops taking part in training exercises, etc. after WWII.

Although Brdy Protected Landscape Area was established in January 2016, the entire area will not be open to the public. There are six locations which will remain permanently closed, which include inaccessible target impact areas.
