

**Symptoms, causes and treatments of observance of human rights in Ukraine***Filonov Oleg**member of the Center of socio-political researches "Russian Baltica"*

Dear Sirs and Madams!

Emergency situation with observance of human rights in Ukraine is similar to the illness. Unfortunately, in the framework of Human Dimension Implementation Meetings organized by Office for Democratic Institutions and Human Rights this subject has not been truly discussed during 3 years of Ukrainian conflict. For a start, we want to list the symptoms of observance of human rights in Ukraine:

- Historical revisionism with far-right tendency;
- Discrimination of Russian-spoken population;
- Repression of free speech;
- Limitations of declaration of will and taking part into elections for millions disloyal Ukrainian citizens;
- Neglecting of fulfillment of social obligations to Ukrainian population;
- Bombardment of civil population on the East of Ukraine.

It is worth to notice that negative impact on the population is selective. Discrimination of Russian-spoken population on the Eastern Ukraine is more active and has more serious impact.

The roots of observance of human rights in Ukraine are 1) the regime of Poroshenko and his allies; 2) financial and institutional support of the regime by the EU and the USA representatives. We remind that during his presidents campaign Poroshenko promised to chase Donbass children into cellars and to prevent them from getting normal lives and educations. However, such statements were not recognized as a threat.

Sponsoring Ukrainian authorities the EU members and the USA encourage anti-Russian position of Ukraine and flying dilettantism of Poroshenko's team in public administration. As a result, the 'black hole' is being created on the Eastern borders of the EU. It will bring some serious

problems, including extra 2-4 million refugees, drag and arms-flows intensification. These processes are seen and developing fast.

To our mind, donor states of Ukraine, NGOs and different sponsors should freeze donations to Ukraine and pack up following tranches with deintensification or full stop of persecutions in the Ukraine because of the language, policy and so on.
