

Monday 28 Working Session (10) Fundamental Freedoms II

Set My People Free Intervention

Alexander Solzhenitsyn Quote

It is time in the West not to defend

not so much human right as Human obligations.

I want to thank for your defending your Human obligation and what you are doing world wide for Human Rights.

Do not be deterred by criticism which is not based on facts and coming many time from the oppressors.

They want to make you feel guilty

like abusing husband always want to make his wife guilty. The cause of the problem is the fighting factions.

You were urged to help to Libya and now you are are blamed for not getting involved in Syria.

You have work for many centuries to get where you are now with the systems, framework and the structures of democracy. Like the form of OSCE. Where you hear our grievance.

We have to realise that As Traffic laws, traffic lights, stop & speed signs are basic 4 safety, freedom of speech, thought, conscious & belief 4 Democracy

@Refuges knowledge and practice of the values of democracy is curtail for a smooth integration into Europe. As many come from totalitarian theocratic regimes.

@Therefore there should be 0 tolerance undermining democratic values of gender equality & freedom of speech, thought & conscience by refugees.

@In democratic states critical thinking and questioning belief & ideologies is not hate speech. It is freedom of expression and opinions. It is important to separate between race and ideology or belief.

Ideology & belief you can join or leave accept or reject. Your Race you got without choice and you cannot change or be blamed for.

This why ideologies, opinions, ideas and believes should not have immunity from critical thinking, debates and common-sense. We make a big mistake and lead to the end of our Democratic values and article 18 & 19 of UDHR.
