

563rd Plenary Meeting

FSC Journal No. 569, Agenda item 4

DECISION No. 13/08
OVERVIEW OF DISPOSAL ASPECTS OF LIQUID ROCKET FUEL IN
THE OSCE AREA

The Forum for Security Co-operation (FSC),

Reaffirming its commitment to the full implementation of the OSCE Document on Stockpiles of Conventional Ammunition (FSC.DOC/1/03),

Noting that the overview of disposal aspects of liquid rocket fuel in the OSCE area consolidates most suitable practices for the elimination of liquid rocket fuel components,

Also noting, that this overview will provide OSCE participating States with information and analyses for developing policies and for designing general guidelines and procedures for the elimination of their unusable or surplus liquid rocket fuel components,

Acknowledging that this overview could also be useful to OSCE Partners for Co-operation and other United Nations Member States in their efforts to tackle the risks and challenges caused by the presence of stockpiles of rocket fuel in surplus and/or awaiting disposal,

Recognizing the OSCE project work on the elimination of liquid rocket fuel components completed so far and welcoming the extrabudgetary contributions from participating States allowing these projects to be conducted,

Decides:

- To welcome the development of the document Liquid Rocket Fuel in the OSCE Area: Overview of Disposal Aspects, FSC.DEL/443/07/Rev.2, which covers, *inter alia*, general recommendations and practical advice for the disposal of rocket fuel components, and endorse it for publication;
- To task the Conflict Prevention Centre, subject to existing resources and/or extrabudgetary contributions, to ensure the widest possible distribution, including the OSCE Partners for Co-operation and the United Nations, of this Overview.
