Safety of journalists is the most important oriority area for the Office of the OSCE Representative on Freedom of the Media (RFoM), since its establishment in 1997. Since taking up his mandate in July 2017, the OSCE Representative on Freedom of the Media, Harlem Désir has set out safety of journalists as his first priority.	States with a database of information on investigations and prosecutions, the Office of the RFoM compiled a list of members of the media who have been killed in the OSCE region in the last 25 years.  This information was compiled in close cooperation with a number of national and international non-governmental	organizations were also a substantial resource. Furthermore, OSCE participating States have been informed about the cases listed here from their respective countries. Throughout 2017 national authorities were invited to check the information and to provide updates if necessary. In some cases answers	inquiry on the part of authorities to effectively investigate and report these cases and punish those responsible.  As this is a draft report, OSCE participating States are encouraged to continue working with the RFoM and provide relevant updates, which will be taken into account.
	cooperation with a number of national and international non-governmental organizations and media associations throughout the OSCE region. Existing databases from other intergovernmental	if necessary. In some cases answers received from different sources were contradictory, confirming the need for such a database as well as continued  Leonid Grigoryev	Mohyedin Alempour
