Ireland	14	Turkey	14
Italy	26	United Kingdom	25
Kazakhstan	4	United States	52
		<b>TOTAL</b>	<b>604</b>
Male	504	Female	100

## LATEST NEWS

- The SMM continued to monitor and verify withdrawal of weaponry as foreseen in the Addendum to the "Package of measures."
- The ceasefire in eastern Ukraine has been largely holding for almost two months now. The majority of explosions have been attributed to demining and most firing incidents to training activities. Nonetheless, there were a number of serious incidents mostly at and around the Donetsk airport that could not be attributed to such activities, some involving fatalities.
- On 22-26 October OSCE SMM Deputy Chief Monitor Alexander Hug visited Donetsk region. He and the SMM team there met with internally displaced persons from Pisky. Moreover, for the first time in the past two and half months, the SMM was able to access "DPR"-controlled Debaltseve, where local residents appeared to be maintaining a very basic existence. Hug also met with interlocutors to solicit support for opening additional SMM Forward Patrol Bases and evaluated several potential locations for these bases in Donetsk region.
- On 27 October the SMM facilitated opening of the bridge at Stanytsia Luhanska on the contact line. The opening was preceded by the SMM facilitating and monitoring the removal of unexploded ordnances on and around the bridge. Read more here: <http://on.fb.me/1Q1iv2F>
- On 4 November the Chief Monitor of the OSCE SMM Ertugrul Apakan will address the OSCE Permanent Council on the Mission's observations during the last three months.
- Daily SMM reports are available in three languages (English, Ukrainian, Russian) on the OSCE website: [www.osce.org/ukraine-smm](http://www.osce.org/ukraine-smm).

## Addendum to the Package of Measures for the implementation of the Minsk agreements

### What has been signed?

The Addendum to the Package of measures of 12 February 2015 is a plan for withdrawal to a distance of 15km each side for tanks, artillery pieces up to 100mm in calibre, and mortars up to and including 120mm in calibre, creating a 30km security zone.

### The SMM role:

- The Mission plays a supporting role through monitoring and verification.
- Within its mandate the SMM monitors and verifies both the process of withdrawal into storage sites and continued compliance with all provisions of the Addendum.
- The signatories of the Addendum remain in control of the process of implementation.
- The objective and impartial reporting of the SMM – to all 57 OSCE participating States – helps ensure that the signatories, too, are aware of progress. This reporting can help them identify any issues at an early stage.
