Energy Independence Is Not Equal to Energy Security!

- Energy security is reliable supply of energy resources
- Reliability means:

minimizing energy vulnerability + increasing new energy resources,
suppliers and transit countries

Political reasons
(political motivation)

Technical reasons (for example, aging pipelines)

Financial-economic reasons (lack of investments)

Does nuclear energy belong to a museum?

Can we meet all our electricity needs with renewables?

2009.07.06-07.

The image shows a slide with a white background on the left and a photograph of two nuclear cooling towers on the right. The towers are emitting white steam that forms a large question mark in the blue sky. The slide contains text in green and red, and a date at the bottom left.

No chance without Nuclear !

The image shows two nuclear cooling towers in a field of green corn. Each tower has a large yellow smiley face painted on its front. The sky is blue with white clouds.
