

Prevention and Response to Hate Crimes  
Message Crimes  
HDIM Warsaw, Poland Sept 26, 2016  
Working session 11

The Annotated Agenda of this OSCE Conference devised a new term: Message Crimes:

What “message” does it send to the citizens of Germany, especially young women, when Government officials and the Media ignore and cover up over a thousand rapes in Cologne on New Year’s Eve?

What “message” does it say to the citizens of Rotherham, UK when 20 years of systematic sexual abuse of over a thousand young girls was covered up by local authorities lest they “damage community relations”?<sup>1</sup>

What “message” does it send to citizens when the Press either ignored the issue or euphemistically referred to the perpetrators as “Asian gangs” when the whole world knows they were Muslim men?

Certainly covering up for, and making excuses for Islamic groups and failing to hold them accountable only increases their contempt and lack of respect for the rule of law in the OSCE Region. It also leaves us powerless to prevent these impositions of the Shari’a norms on our society.

Rather than enhancing dialogue and understanding with Islamic groups, this appeasement and failure to stand up for Western laws and culture by Western governments will only lead to the eventual annihilation of Western Civilization!

The ACT 5280 Coalition recommends that the OSCE define the violent imposition of the Shari’a as a “hate crime” against non-Muslims.
