Letter of concerning

Reading the articles which informs about the racist attacks in Italy, honestly I can't see effectiveness of all political processes and activities initiated by the European institutions.

Promoting Intercultural dialogue, affirming action against racism, promoting democratic society, raise the question what is going on with the Roma people true Europe.

Italy –Molotov cocktails bung in Roma community, in Slovakia have been murdered Roma and still there are not official reactions. Roma people from Kosovo are still leaving in fear to be deportate in country with out any safety and basic leaving conditions.

But still European countries don't consider the fact of existing discriminatory acts and racism daily are growing against Roma.

The segregation issue is still present in many countries, Roma kids are not accepted from the teachers, lots of prejudices and stereotypes from the non-Roma parents. And we are leaving in the 21st century, the sickness of the society are the prejudices, stereotypes and racism.

The fight for human rights became fight for surviving of different minorities and stateless nations.

So the question is are we are losing in this fight or we became just marionettes who are serving to accomplish high profile savor.
