WIN Project (WIN for Women and Men - Strengthening comprehensive security through innovating and networking for gender equality) is a strategic project that aims to accelerate the implementation of the 2004 Action Plan. The WIN Project supports the achievement of substantive gender equality on all three OSCE dimensions covering the WPS agenda and women's role in conflict prevention, gender perspectives in economic and environmental activities, and preventing and combating violence against women and girls.

Through studies, development of new tools, capacity-building, and other activities, WIN Project supports existing OSCE-supported networks and incubates new networks at the national and regional levels, focusing on women's participation and leadership, as well as broader men's engagement in achieving gender equality, etc.

The WIN Project relies on a **collaborative approach** and complements existing cooperation among various actors – OSCE executive structures, OSCE's 16 Field Operations, International Organizations, and International NGOs, and creates new synergies by implementing **activities** aimed to accelerate implementation of OSCE commitments on gender equality. WIN creates platforms for OSCE-wide exchange of good practices, lessons learned and

knowledge transfer of the intersection of gender equality and comprehensive security.

WIN introduces **innovative and transformative approaches** to gender equality in all dimensions of comprehensive security through the development and application of cutting edge learning methodologies, monitoring and evaluation tools.

Full-scale project implementation started in 2021, after an inception phase. The WIN team consists of a Project Manager, Project Assistant and National Project Officer based in Ukraine, working closely with the Gender Issues Programme Advisers in the Secretariat. They implement activities in close coordination and consultation with different OSCE executive structures, and external stakeholders.
