Innovative collaboration and networking

5 July 2013

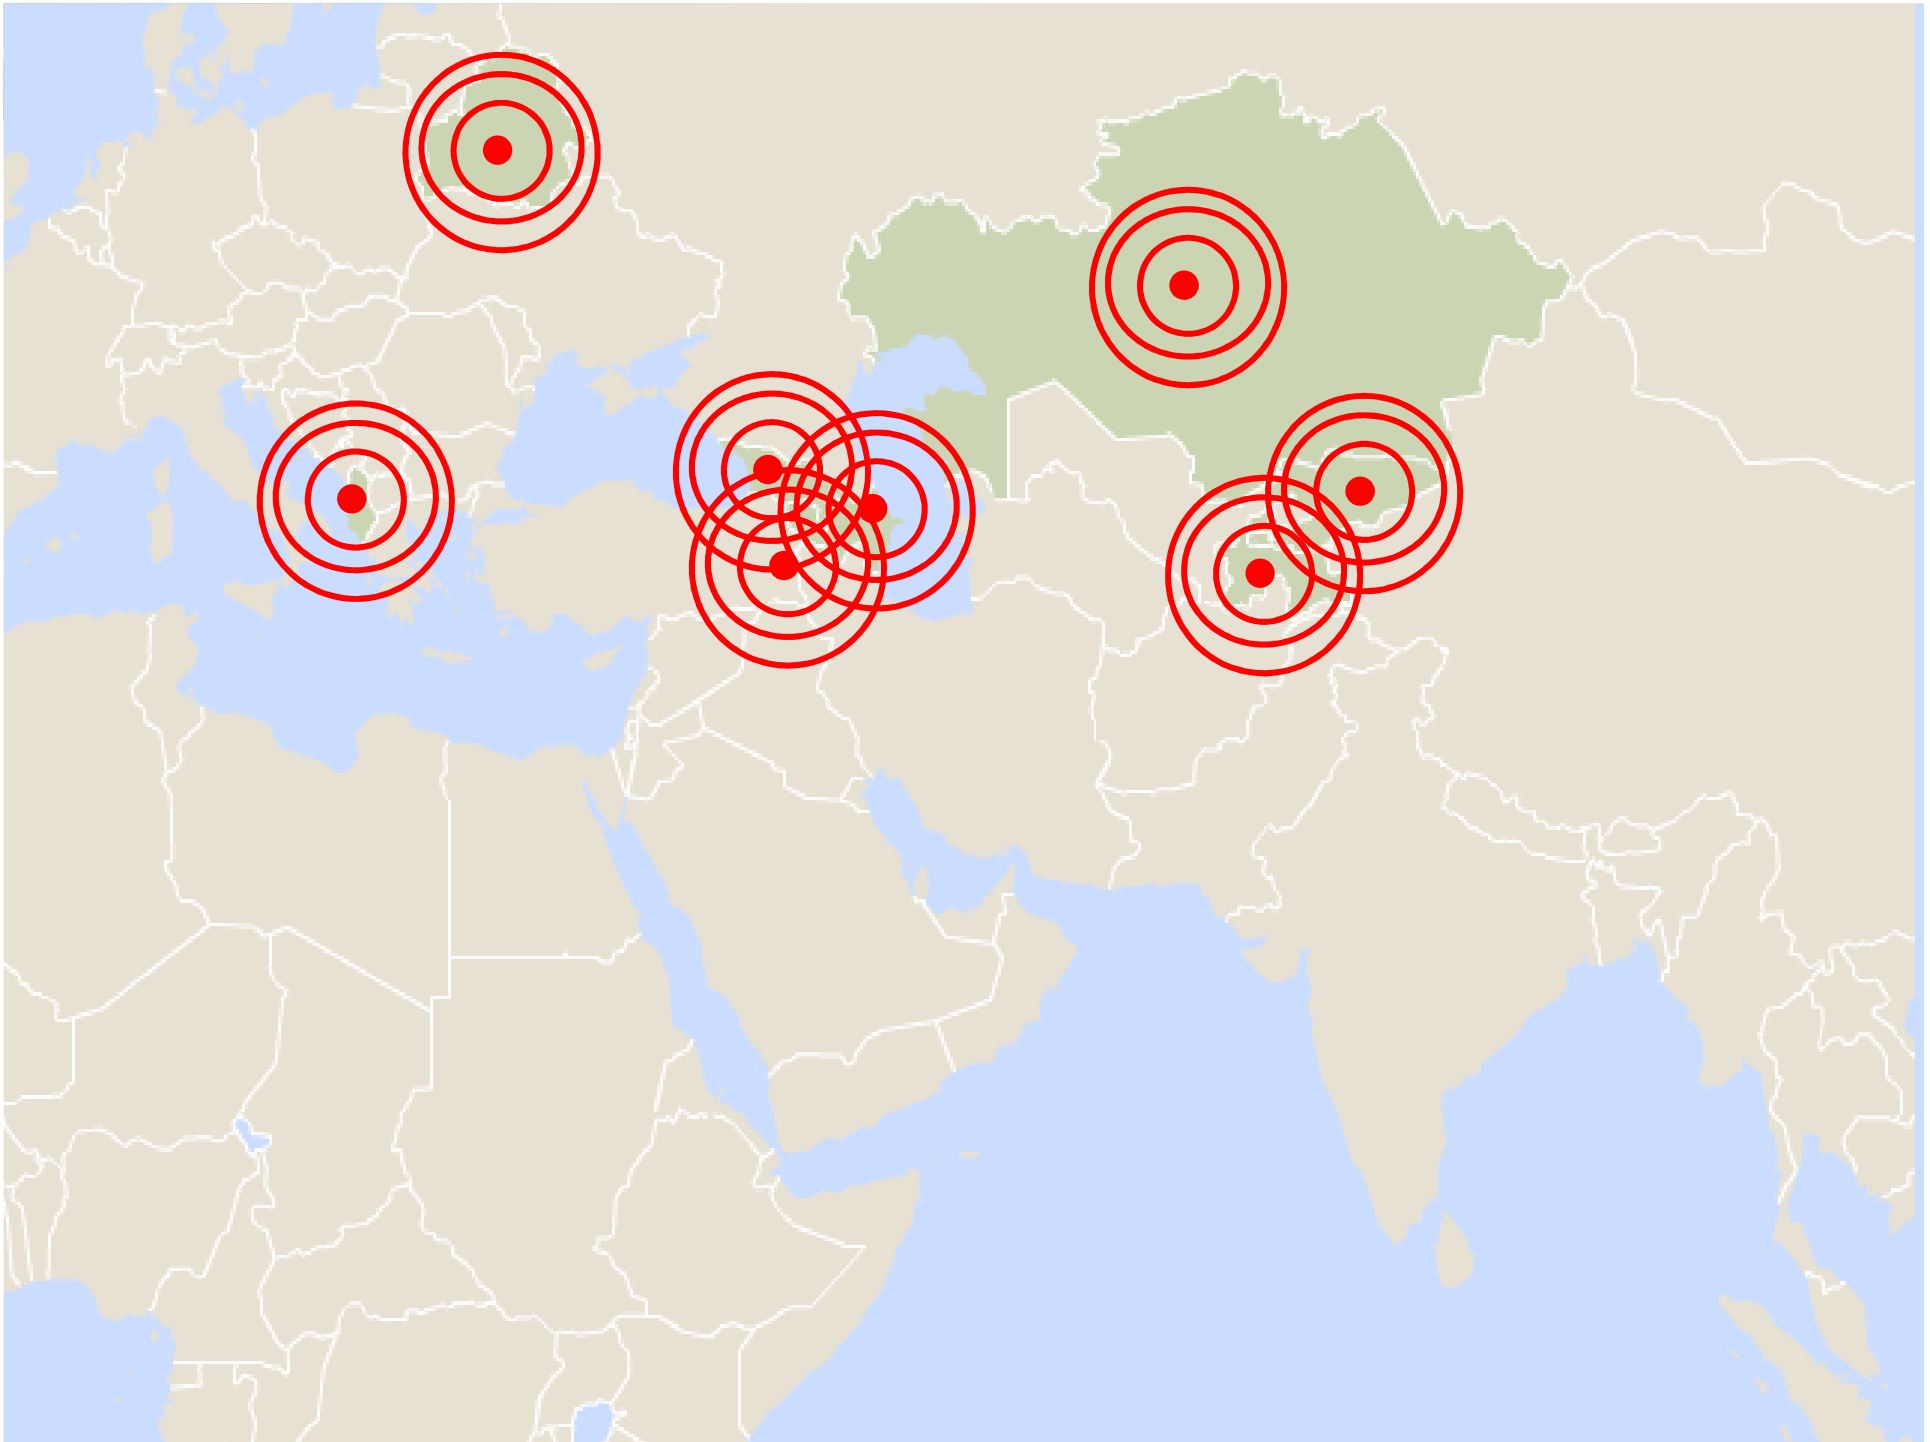

“Aarhus Centres: A Decade of Partnership in
Implementing the Aarhus Convention”

NETWORKING

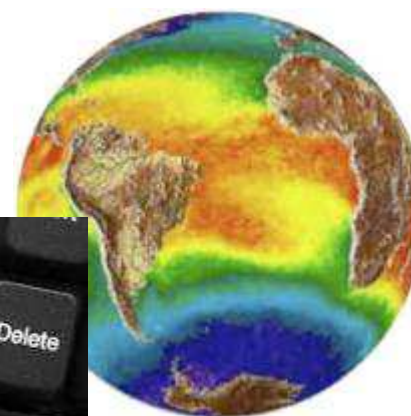

An interconnected group or system

Collaborative work, exchange of information, sharing of knowledge and capabilities, integration

Aarhus Centres activities

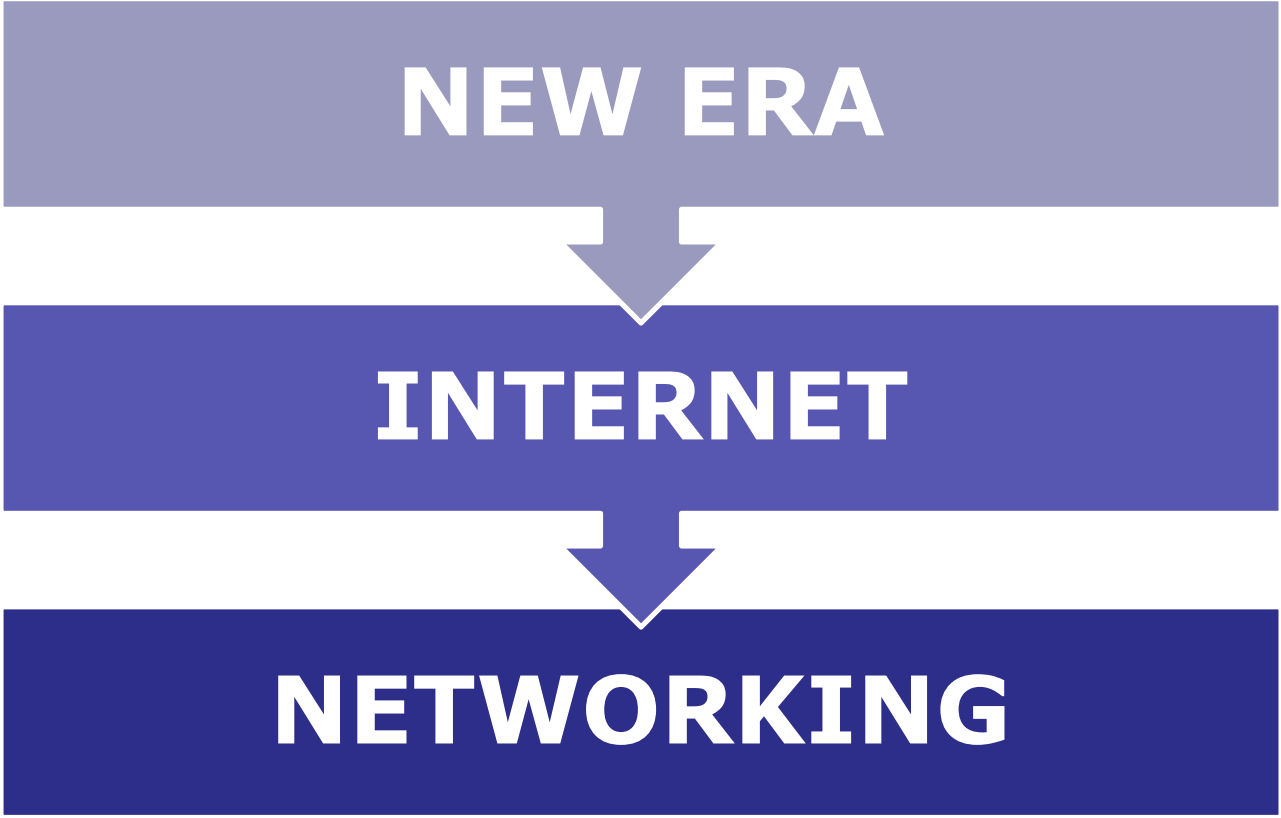

Knowledge, international, partnership, innovation, diversity, innovation, knowledge, expertise, new technology, transfer, learning by doing, network, skills building, etc.

The background features a series of overlapping, semi-transparent circles in shades of yellow, green, and blue. The circles are arranged in a way that they appear to be part of a larger, abstract design. The overall color palette is vibrant and modern.

Just one click away

ownership, innovation, knowledge, transfer, action, learning by doing, responsiveness, leadership, approach, methodology, research on knowledge systems, new technologies, capacity building, learning by doing, networking, leadership, skills building, methodology, training, research on knowledge systems, new technologies, capacity building, learning by doing, networking, leadership, skills building

knowledge, international, bank, online, internet,
diversity, innovation, knowledge, studies, research,
transfer, expertise, new technology,
learning by doing, network,
ship, skills building,
ing, etc.

Online social networking:

It is the practice of individuals connecting and communicating around a common interest using online tools and social networking sites.

WEB 2.0 = SOCIAL MEDIA

- Information dissemination
- Communicate
- Collaborate

**Interaction
on the
internet**

knowledge, international, participation, diversity, innovation, knowledge sharing, transfer, expertise, new technology, learning by doing, return, skills building, etc.

UK Human Rights Blog

TAG ARCHIVES: AARHUS CONVENTION

APRIL 11, 2013 BY DAVID HART QC

The CJEU on “prohibitively expensive” and the new protective costs order regime

R (Edwards & Pallikaropoulos) v. Environment Agency et al, 11 April 2013, read CJEU judgment, and read Opinion of A-G Kokott,

and the Civil Procedure Rules 45.41 to 45.44, in force from 1 April 2013,

with Practice Direction 45

Twin developments, both of which are important for those involved in environmental cases. They emerge from the UK’s treaty obligations flowing from the Aarhus Convention under which it is obliged to ensure that environmental cases are not “prohibitively expensive” per Article 9(4) of the Convention.

The first development is a decision by the CJEU on the meaning of those words.

The second is a new set of rules providing for protective costs orders in environmental judicial review claims. [Continue reading →](#)

Through a Web Darkly

On Friday 27 May, Demos hosted a panel discussion on the impact of the internet on democratic culture, institutes and engagement.

Featuring Evgeny Morozov, Dan Hind and Tom Chatfield, and hosted by Ben Hammersley, the event attempted to distinguish between the good, the bad and the ugly when it comes to the interaction between new media and our politics.

This audio is part of the collection: [Community Audio](#)

In the following example the three basic levels for supporting collaboration through groupware applications are used.

Example: Communication, conferencing and collaboration

Karla is coordinating a group of Water and Sanitation experts from five distant communities around the country. They have decided to put together a joint strategy for local governments. They had the opportunity to meet once in person and exchanged e-mail addresses.

For Communication purposes, Karla decided to setup an e-mail list in a service called [Dgroups](#).

[More detail](#)

The group decided to have a chat Conference once a week by Instant Messenger (IM).

[More detail](#)

Collaboration. When it was time to write the proposal, Karla posted a first draft on a free wiki service called [PBworks](#).

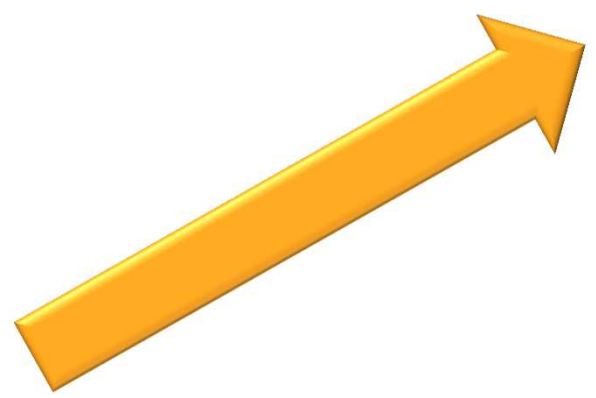

[More detail](#)

For Content Management, Karla is saving external resources they team is finding on [Scoop.it](#), a content curation tool.

[More detail](#)

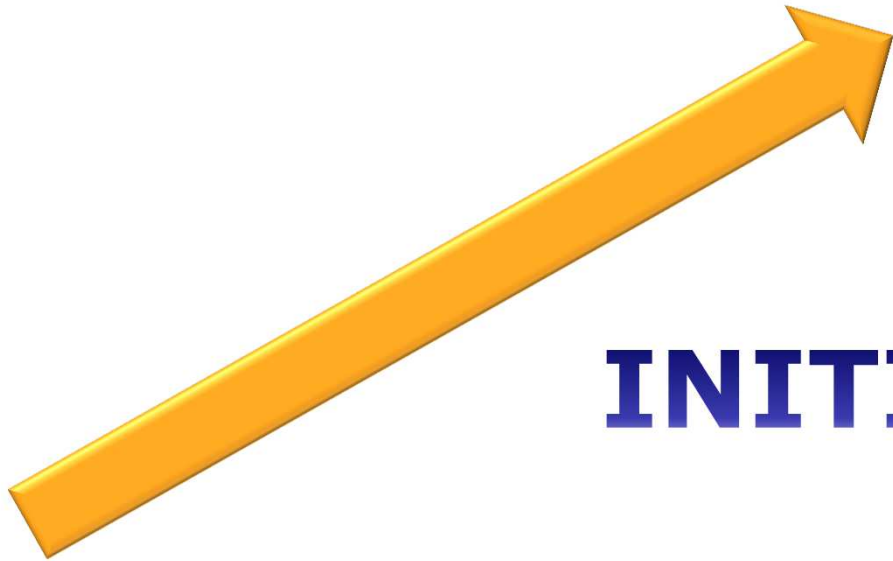

The background features a vibrant, abstract design with swirling patterns in shades of yellow, orange, green, and blue. Overlaid on this is a faint, semi-transparent grid of text in a light blue color. The text includes terms such as 'ownership', 'transfer', 'action', 'learning by doing', 'responsiveness', 'leadership', 'approach', 'methodology', 'research on knowledge systems', 'new technologies', 'capacity', 'learning by doing', 'network', 'leadership', 'skills building', 'methodology', 'training', 'research on knowledge', 'technologies', 'learning by doing', and 'skills building'.

Commission for Environmental Cooperation (CEC) Ministerial Statement - Eighteenth Regular Session of the CEC Council

June, 2011 North America The environment ministers of Mexico.

PRTR:Learn is an interactive site that has the main objective of sharing insights, information, knowledge and resources on Pollutant Release and Transfer Registers (PRTR). About 30 countries around the world already report emissions and transfers of chemicals to air, water and soil through their PRTRs and about 14 countries are in the process of designing their own PRTR system. This platform provides the space for countries implementing and designing PRTRs to share their experiences on reporting pollutants in their territories, enhancing the exchange of lessons learned and facilitating the provision of knowledge to countries that will develop PRTRs in the future. It also provides a space for public to obtain information on the latest news on PRTRs and to increase its participation on environmental issues.

Access documents on technical aspects of PRTRs, follow e-learning courses, share insights with others in forums and webinars and find about news and events on PRTRs around the world. [Read more](#)

PRTR Initiatives Map

The map displays various countries in yellow and blue, with several red location markers. A pop-up window titled "PRTR initiatives in Georgia" is open over the country of Georgia, showing the national flag and a list of four numbered points.

PRTR initiatives in Georgia

1. Georgia is implementing a SAICM Quick Start Programme project to design a national PRTR system. The project runs until December 2011.
2. The existing infrastructure relevant to a national PRTR has been assessed and the key features of the national PRTR system (including list of chemicals to be reported, reporting format, etc.) have been designed.
3. A website containing PRTR information has been developed.
4. A pilot reporting trial is currently being carried out with cement production facilities and, based on the outcomes, Georgia will
