

Thinkout

## THINKOUT Recommendations

03 July 2014

Thinkout is a Belgian based non governmental organisation.

Thinkout has for challenge to include, integrate and enforce the different cultures in Europe in the mainstream society while respecting the human rights.

Thinkout attended the session I of the meeting of OSCE on 15<sup>th</sup> April 2016 concerning **"Education and Awareness-Raising to prevent Intolerance and Discrimination, including Hate crimes, Hate speeches and Hate on the internet"** and made following speech and recommendation.

It is a fact that people use more and more hate speeches, leading to hate crimes. Hate speeches especially against the muslim community are even encouraged by the politicians and the leaders of Europe.

The main goal of the european union was to end the disputes between neighbours during the World War II.

So Europe had to become a peaceful, united and prosperous place. But today Europe which has shining a long time thanks to human right is sinking in intolerance.

Indeed, French and Belgian leaders accumulated verbal attacks against Muslims. For example, France Prime Minister Manuel Valls and the Prime Minister of the Flemish region Geert Bourgeois used immediately hate speeches who associate the last terror attacks to Islam, for example by pleading after the terror attacks for a Western Islam. By doing this, Islam is placed in a terror position!

This doesn't represent the true story, but distracts the target! We cannot be blind for the real causes of these problems, by doing this we're delaying and making a solution impossible.

The true question that should be asked in fact was:

"To take the West EU member states in first place, how many countries in Europe are fulfilling today the human rights statement? Let us be honest in discussing this issue.

For example, the human rights article 9. In which European countries is this article implemented practically?

To conclude, it's very important to understand that the only way that will solve this inhumane situation is when the law will be implemented equally for each person.
