

ANNEX: UAV image shortly before loss of communication and its location

Figure 1: The image shows a multi-purpose tracked vehicle (MTLB) with a surface-to-air missile system (9K35 *Strela*-10, 120mm) mounted on top. It was taken by the UAV near “DPR”-controlled Ozerianivka shortly before all communications were lost.

Figure 2: The image pinpoints the location of the UAV when it observed the MTLB with a surface-to-air missile system (9K35 *Strela*-10, 120mm), the position of the MTLB, and the last known location of the UAV.
