HDIM.NGO/343/06
10 October 2006

My name is princess loona priest and spokesperson for the European Raelian movement, atheist religion we believe that we have been created by humans from another planet

I hope that with your help we will slow down the SCANDALOUS discrimination of 3 governments: France; Switzerland and Belgium. My dream is to come back next year and testify the progress in our relations with these governments

for the moment they don't follow the human rights and the OSCE recommendations they go on with their politics of discriminations against religious minorities.

The individual consequences are tremendous-

Raelians suffer from

Lost of parenthood in case of divorce

lost of job for the only reason that they are raelian

death threat and verbal aggressions

impossibilities to rent public rooms;

social and familial rejections and so on

- **In Belgium the government goes on financing a center of information and a cell of coordination to fight what they call sects**

Following the spreading of the sect list by the government to medias and following the campagne of french community called « guru be careful », last month an echevin Mister Yves Vander Cruysen, uses his political power to cancel one of our conference in a public place that we rented (despite he is responsible for the cults!!!). Newspaper's articles and media's shows, went on spreading horrible accusations on us with consequences on the everyday life of our members

-

In Switzerland the federal court refuse to receive our complains while these complains should be received according to the penal right.

1. **A restaurant refuse to serve a drink to a person because she is raelian. The court judge the restaurant non guilty.**
2. **The raelian movment is excluded from their own bank . We are on list of unwanted customers.**
3. **Many of our leaders in suitzerland loose their jobs several times only because they are raeliens.**
4. **Following the bad media atmosphere against us we receive several death threats and violences.**
5. **During a communal cession in Lausanne the conciler Egli, and the newspapers le La Liberte pretend that the federal court could have admit that the raelian people stand for pedophilia and incest while our texts condemn very clearly this mental seekness; a complain is being process against them.**

all the documents and proves on these cases are available

In France :

a new commission of parlement s enquiries on the “ risks and bad effects of sects on awakensness for childs” was voted on the 27th of June 2006, and created 24 hours after the 28th of June . the representativity was only of 1,47% of the parlement, means 10 deputies on the 577 and all the voted people are the members of the commission in charge of the enquiry.

The general assembly’s channel explains the first meeting of the commission and it’s conclusions. The result is that our members are qualified of “pedophiles” which is absolutly unacceptable !

- **In fact in France the government continues giving money to the UNADEFI and the MIVILUDES to lead their action to fight against religious minorities..**

These commissions, admit they haven’t found anybody to complain against minorities and go on despite that, to call for fear and pure destruction of spirituel and therapeuthique minorities. Soon in France if you give herbal tea to your kids because is sick you will be condemned because you are in a sect !!!!!

That’s why we ask with insistance again, to belgium french and swiss governments:

1. **to end the interference of public powers in religious organisations and to renouce all political discrimination**
2. **abolish the subsidies and other financial support given to anti-sect associations. The money comes from tax-payers and among them are membres of religious minorities so their own money is used to fight against their own beliefs ! This is against the constitution which clearly stipulates a total separation between state and religion.**

3. the law must be the same for everybody no matter what religion they have

We ask to the Belgium government:

- 1. to stop the exception law creating the Center of informations and advices on bad sect's organisations and the coordination cell to fight against the bad sect's organisations.**
- 2. to look backwards on the constitution to include the total separation between the state and religions/ philosophies by creating a system of financement allowing every belge people to choose and to give to one or another philosophical/ religious of his choice (netherlands system)**
- 3. to order to its political deciders and to the all justice system to stop discriminating religious minorities and on the contrary to spread a true objective information based on facts and universities studies.**

We ask to the French government:

- 1. the dissolution of the UNADFI, association suposed to fight against « bad sect's behaviors » compromissing the freedom of conscience and subventionned by our own taxes.**
- 2. the immediat stop of the new commission of parlement's enquiries on the "risk and bad effects on the awaking of the children" voted on the 27th of June 2006.**

We ask the OSCE:

- **to advice to members states to stop using the term « sect and to replace it as « religious minority .**
- **To promote the dialogue between states and religious and philosophical organisations in their own countries.**
- **To create a body in charge of censuring the world's religious writings to rid them of the incitement to hatred and violence as well as expurgate all that disrespects the basic principles of Human Rights. The violence contained in some religious books make these books more dangerous tahn fire arms**
- **The council of europe has condemned the 3 major religions catholic jewish islamic for not respecting women in their texts and practice .**

Statisticly there is more violences murders suicides in the "normal" society; as an exemple on suicide: the national education and the police have more suicides in their people as in the all religious minorities taken on several years. Are the national education and the police dangerous sects?

. All Raelians are proud of their religion and they will continue their non violent fight for freedom and for a better world without discrimination. We are sick of being stigmatized *being treated like second class citizens ships.*

Peace and love to all those who will help to make of this world a world of freedom and tolerance.
