THE 5th INTERNATIONAL SCIENTIFIC CONFERENCE ON ENVIRONMENTAL CRIMES, ENVIRONMENTAL SAFETY AND NATIONAL SECURITY

TIRANA, JANUARY 2020

Call for Participation

The Security Academy, in co-operation with OSCE Presence in Albania, organizes the 5th International Scientific Conference with international participation, called: “Environmental Crime, Environmental Security and National Security”. Academics, scholars, professionals - from the country and the world - students and employees of the State Police and all law enforcement institutions and beyond are invited to submit papers, projects, proposals and presentations to the conference. The Security Academy invites all participants who wish to present their work at this conference to send abstracts of their original works until 15 September 2019. Abstracts will be evaluated by the scientific board and if a positive response is received, full papers must be submitted by 1 November 2019. The conference will be held in Albanian and English (for foreign participants). Foreign participants will have a translation service in English.

Works can be sent to: konferenca.akademia@asp.gov.al
Conference Coordinator: gjon.vorfi@asp.gov.al

THE CONFERENCE’S FOCUS

The focus of this conference will be environmental safety, which in recent decades has become one of the most important pillars of human, national security and international security. Because environmental security focuses on investigating the threats that arise through the environment to the international community of nations; to society and to man, then the focus of this conference will be broad, inclusive and associated with these threats. This focus will serve to build a comprehensive environment-related framework. This framework will be in the function of clarifying and raising the information and awareness of institutions, society, law enforcement agencies and the State Police as an institution that has its own part in terms of environmental safety. Alongside the broad focus of the conference, its specificity is to identify and address environmental safety in view of the responsibilities, needs, strategies and obligations that come to the police regarding environmental crimes. The role of the police in solving environmental problems is important because these problems are often of a criminal nature and trans-boundary.
THE CONFERENCE’S OBJECTIVES

The main objective of this conference is the presentation of analyzes and prognoses, both in terms of environmental crime investigations, and in terms of addressing environmental security across its broad sphere, where impacts and interweaving are at national and international security. The conference aims to improve the academic knowledge of environmental safety by contributing through scientific works. This knowledge is intended to serve to improve the academic and professional level of police, related to environmental crime and to deal with criminal offenses that are of such nature, or that interfere with environmental protection.

THE CONFERENCE’S PURPOSE

The conference aims to scientifically address the degree of importance of the legal-criminal protection of the environment; the meaning of criminal acts against the environment and the treatment of their general figures; types of offenses against the environment; handling the understanding and the features of investigating environmental criminal acts, etc. The goal is to improve environmental safety in our country, through academic contribution of police and not only: by sharing best environmental practices and lessons learned; forming bilateral and multilateral cooperation, identifying actors and responsibilities, legal deficiencies and recommendations for the future; presenting existing practices and further recommendations on curricula, programs and training in the field of environmental safety of police officers and beyond.

THE CONFERENCE’S AIM

This conference aims to unite academics, scientists, professionals and experts in the fields of security, environment, international relations, etc.; prosecutors, judges, judicial police officers and other experts to share experiences, practices, scientific work and findings in all aspects of environmental security. The conference will have these main goals:

- Strengthening and emphasizing that environmental security is a tangible, true, substantial and very sensitive element of national security, of each country and, by making a specific approach to Albania;
- Enhancing cooperation and advancing environmental dialogue between actors in the country and in the region;
- Raising awareness on environmental safety issues, best practices and lessons learned to improve Albania's basic environmental safety capability;
- Dealing with juridical and legal aspects of historical comparisons of environmental crime within and outside the country;
- Providing recommendations for enhanced policies to the State Police and relevant structures that address this issue in the framework of improving police work and reducing crime or preventing the occurrence of environmental crime;
- Detailed coverage of all legal and technical aspects related to the practical management of environmental problems at the local level, under the conditions of Albania and using the best international practice in this area;
- Raising qualitative methods of environmental crime investigation.
THE CONFERENCE’S TYPE

The conference is of the type "international scientific conference". It will be developed in front of an auditor who will have researchers from the country and the world as well as academic staff from the Security Academy; domestic and foreign researchers and experts on security issues; leaders and specialists of the State Police structures, other law enforcement agencies; representatives of foreign police missions assisting the State Police; representatives of academic partner institutions in the country and academies, colleges and police universities from partners abroad.
