

Promoting digital security  
in the business sector

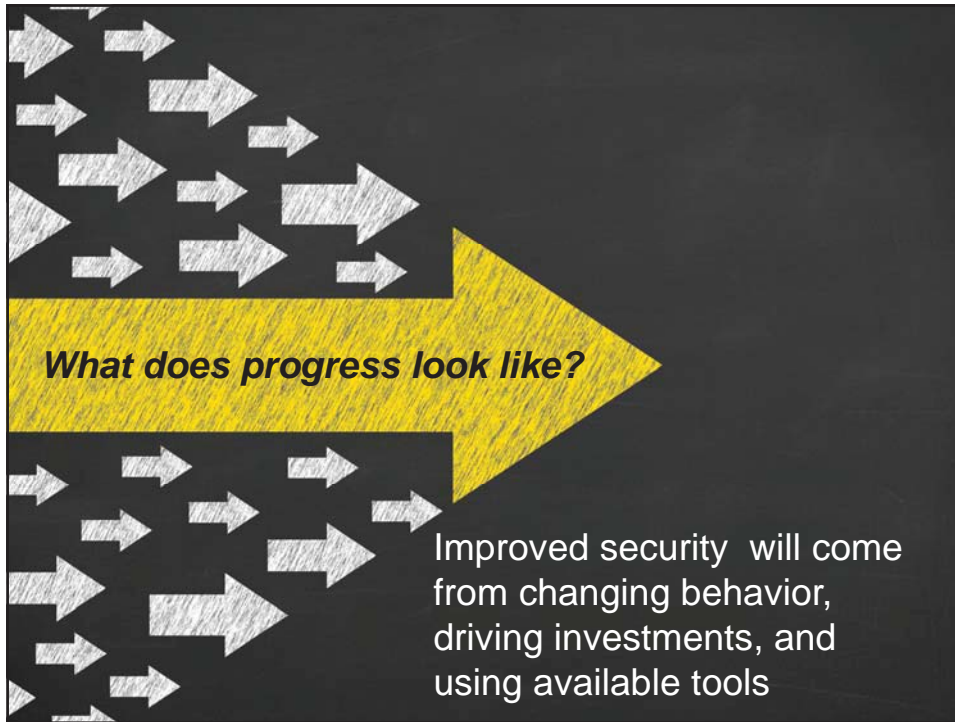

Government as market catalyst

Allan Friedman, PhD  
Director of Cybersecurity Initiatives, National  
Telecommunications and Information Administration,  
United States Department of Commerce

1

**Cybersecurity risks  
are real, increasingly harmful,  
and ever-evolving**

Some quick examples

6

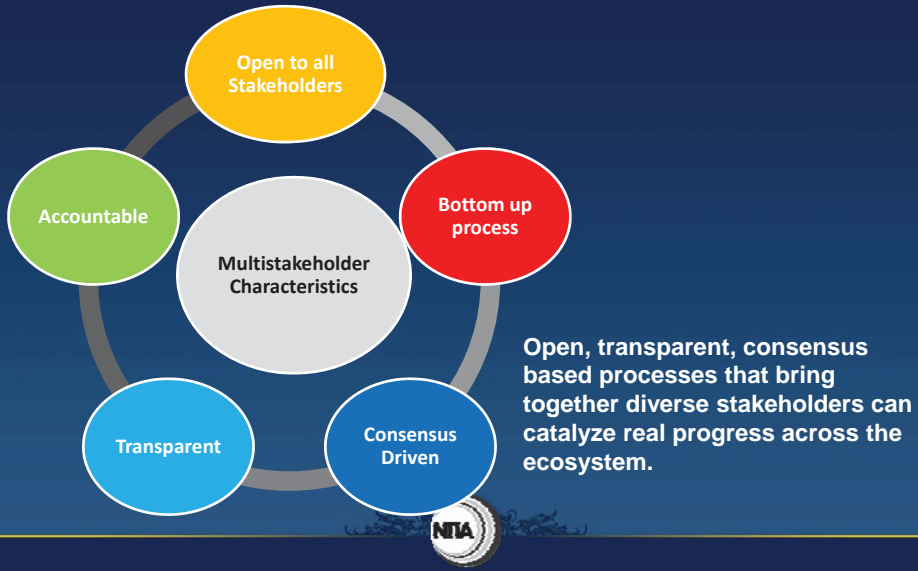

### NIST Cybersecurity Framework

	Function	Category
What processes and assets need protection?	<b>Identify</b>	Asset Management
		Business Environment
		Governance
		Risk Assessment
		Risk Management Strategy
		Supply Chain Risk Management <sup>1,1</sup>
What safeguards are available?	<b>Protect</b>	Identity Management, Authentication and Access Control <sup>1,1</sup>
		Awareness and Training
		Data Security
		Information Protection Processes & Procedures
		Maintenance
		Protective Technology
What techniques can identify incidents?	<b>Detect</b>	Anomalies and Events
		Security Continuous Monitoring
		Detection Processes
What techniques can contain impacts of incidents?	<b>Respond</b>	Response Planning
		Communications
		Analysis
		Mitigation
		Improvements
What techniques can restore capabilities?	<b>Recover</b>	Recovery Planning
		Improvements
		Communications

## The Multistakeholder Model

## Vulnerabilities

## Vulnerability Disclosure

*No one likes being told their precious baby is not perfect*

11

## Vulnerability Disclosure: Template Disclosure Policy

It looks like you're trying to work with hackers. Do you need help?

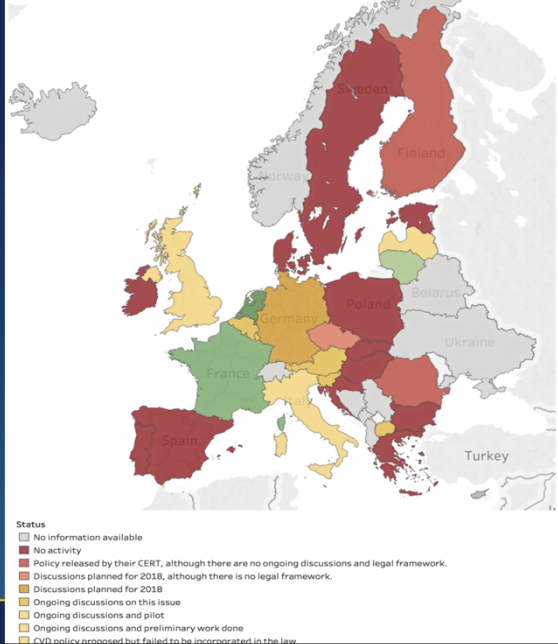

**Outcome: Stakeholder-drafted "early stages" template disclosure policy with a focus on safety-critical industries**

## Vulnerability Disclosure: A growing trend

Source: CEPS, 2018

13

## Security: Where is the 'S' in 'IoT'

As a starting point, we convened stakeholders to focus on "patchability," to foster an ecosystem that can be more resilient.
