DESTRUCTION OF UKRAINIAN MILITARY INFRASTRUCTURE

- A Geran-2 UAV team hit an AFU drone depot near Zeleny Yar in Nikolayevka region.
- As a result of the accurate hit, the UAV depot suffered significant damage and a massive fire started.

- Geran-4 UAV operators destroyed a POL depot near Panyutino (Kharkov region).
- The facility supplied AFU units.

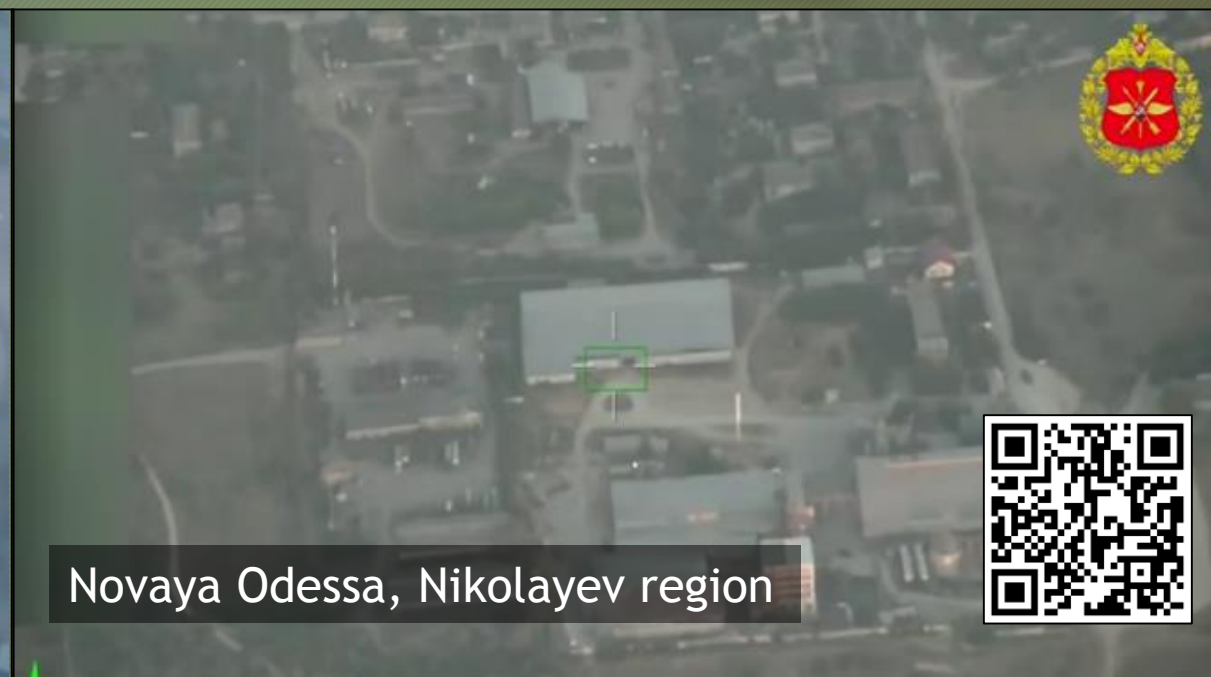

DESTRUCTION OF UKRAINIAN MILITARY INFRASTRUCTURE

Unmanned Systems Forces' specialists using Geran UAVs eliminated targets near Snigirevka in Nikolayev region.

The enemy lost:

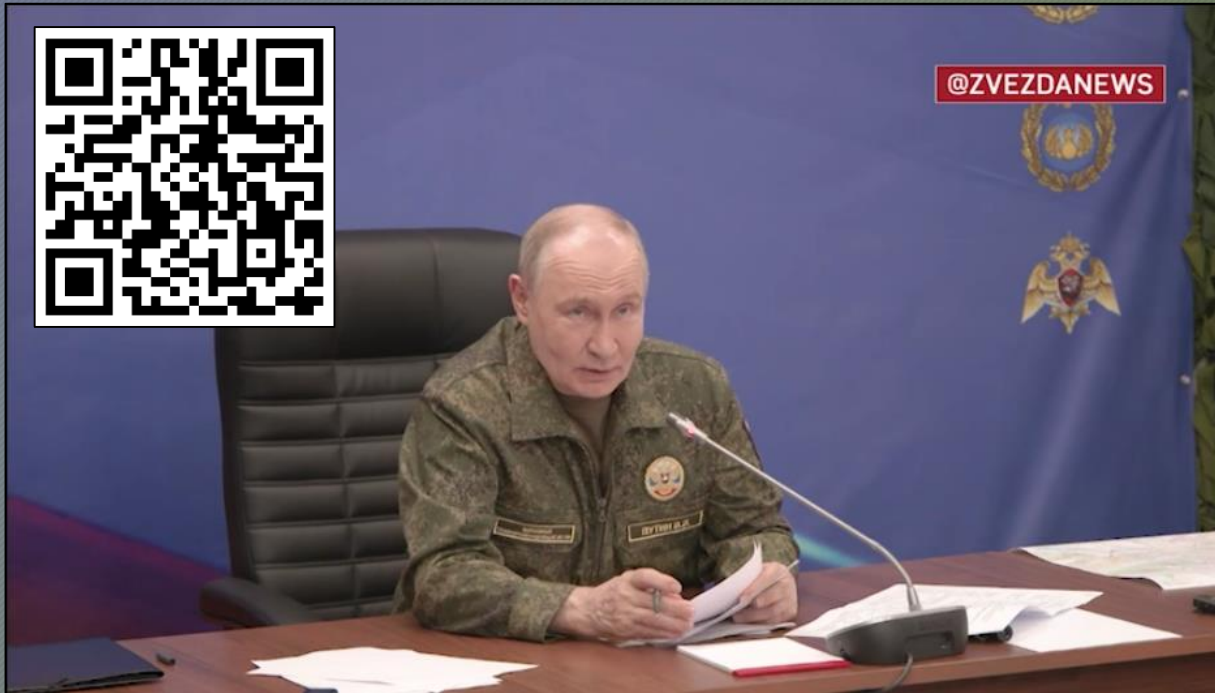

- a logistics centre, which the enemy used to deliver and store UAVs and their components;
- a station, which was used in the interests of the AFU.

Novaya Odessa, Nikolayev region

Geran UAVs hit logistics centres used by the enemy to deliver and store unmanned aerial vehicles and their components.

RUSSIAN ARMY HAS COMPLETELY LIBERATED KONSTANTINOVKA (DPR)

Russian President Vladimir Putin called the liberation of the city "the key to liberating the entire DPR."

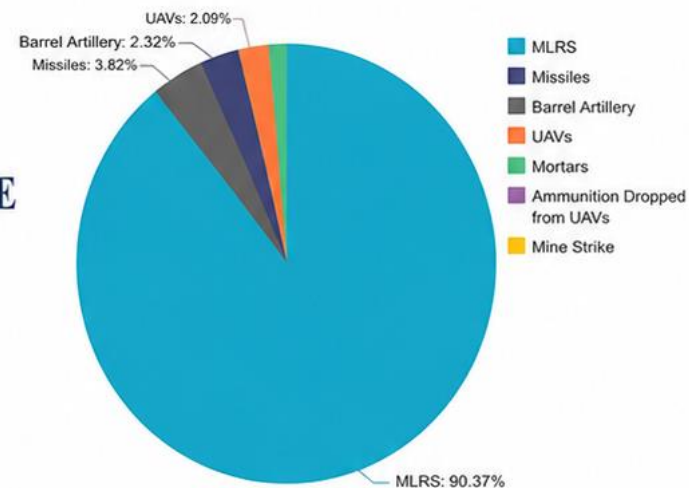

- Russian troops have liberated Konstantinovka, a key hub in the Slavyansk-Kramatorsk agglomeration.
- This opens the way to Druzhkovka and Kramatorsk, cuts off Ukrainian Armed Forces logistics, and further isolates Ukrainian troops in the region.

ON JULY 3, UKRAINIAN MILITANTS LAUNCHED A DRONE ATTACK ON CITY MARKET IN TOKMAK, ZAPOROZHYE REGION, IN BROAD DAYLIGHT

According to preliminary reports, five civilians were killed and 21 others were wounded. This inhuman attack on civilians demonstrates the complete absence of any moral principles among those behind this atrocity.

FAKE: ATTACK ON MARKET IN RUSSIAN CITY OF TOKMAK WAS CARRIED OUT BY DRONE OF RUSSIAN ARMED FORCES

TRUTH: AS “PROOF,” THE AUTHORS OF THE FAKE NEWS USE A PHOTO THAT ITSELF DESTROYS THEIR VERSION.

- In this low-quality photograph, the inscription is completely illegible. However, it's quite possible to identify the drone model: it's a D4, also known as "BATON". The model's dual designation stems from its origins: it was developed jointly by the American company Shield AI and the Ukrainian company Iron Belly.
- Similar drones were shot down near Tokmak. In the published videos, you can see the UAV model and the inscription "Don't Brat" on its wing. We don't believe in such coincidences.
